CHRISTINA BURGOS | SOFTWARE DEVELOPER

Philadelphia, PA • christina.brgs@gmail.com • (267)770-3133 • [Linkedin](#) • [GitHub](#) • [Portfolio](#) • [Case Studies](#)

Front-end focused developer with React, TypeScript, and design system experience in fast-paced environments. Previously supported startup teams and legal orgs with end-to-end delivery, UI architecture, and scalable, accessible web and Mobile app solutions. I'm passionate about empowering underrepresented communities in the tech world. I organize events for developers at [phlcode.club](#).

PROFESSIONAL EXPERIENCE

DYAD COMMUNICATION   **Philadelphia, PA**
Front-end Developer   **Aug 2025 - Present**
- Built and maintained WordPress themes and ACF-powered Gutenberg blocks using PHP, HTML, CSS, and vanilla JavaScript for 3-5 small businesses per week.
- Conducted site maintenance and modernized legacy PHP and front-end codebases, improving performance, maintainability, and security across 5+ client projects monthly.
- Implemented custom page and post types, taxonomies, and dynamic templates in WordPress, automating page creation and eliminating manual updates.

CBTALIA DESIGNS   **Philadelphia, PA**
Software Developer, Designer, Consultant   **Dec 2023 - Aug 2025**
- Exemplifying dynamic leadership, I adeptly navigate the domains of app development, UX design, and tech maintenance, crafting tailored solutions that intricately align with the diverse needs of clientele, ultimately driving project success.
- Developed a mobile app for Coached, a platform for olympic athletes to coach high level athletes, enabling real-time feedback using React Native, TypeScript, and Google Firebase. [joincoached.com](#)
- Utilized Figma to transform client proposals into deliverable web and mobile designs, prototyping 40+ original pages with interactive flows to illustrate wireframe progression.
- Concurrently consulted as Dynamics Admin at iNRCORE LLC, where I assisted in platform maintenance, efficient troubleshooting of user and instance issues, and process automation.

TEMPLE LAW   **Philadelphia, PA**
Web Designer & Developer   **June 2023 - Dec 2023**
Temple Law Career Platform - Central hub designed for the Public Interest Tech (P.I.T) department
- Single-handedly designed, branded, and spearheaded the development of an informational hub for the Temple Public Interest Tech Career Fair, in close coordination with the executive director of the Temple School of Law. Explore the finished product at [explorepitlaw.com](#)
- Delivered web app in 1 month timeline, led client and team directly through research, design, development, and test phases in weekly sprints, engaging 472 visitors upon launch and roughly 40 active users a month.
- Prioritized accessibility and responsive design to accommodate a wide user base, utilizing Figma, React and WordPress (Elementor).

RESILIENT CODERS & RC ASCEND   **Philadelphia, PA**
Fullstack Engineer   **Feb 2023 - Dec 2023**
- Completed 100% of my tickets within 1 week SLA, implementing routing, API integration, and state management to support dynamic user experiences across multiple features.
- Designed and developed full-stack applications leveraging OpenAI's REST API and a Node.js backend to deliver personalized user experiences based on in depth user profiles, from dynamic fitness plans to collaborative learning tools.

INRCORE LLC   **Bristol, PA**
IT Generalist | System Admin   **June 2020 - Feb 2023**
- Managed and maintained IT systems including ERP programs, Microsoft Office Applications, Azure AD, and Dynamics CRM for 100+ employees across 5+ company branches
- Enhanced cybersecurity by addressing software vulnerabilities in compliance with ITAR regulations and leading company training that resulted in a 45% reduction in phishing incidents, measured by simulated testing data.
